SANTIAGO VILLARES

Bachelor's in Digital Business
Buenos Aires, Argentina | santiagovillares64@gmail.com | linkedin.com/in/santiago-villares

PROFESSIONAL SUMMARY

Digital Business graduate (Universidad de San Andrés) who builds things from scratch by combining data, product, brand and applied AI: I built a wine brand starting from a bottle, led a 200-person mission, trained machine learning models and automated processes with generative AI. I dive into worlds I don't know until I can lead them. Advanced English, validated by full-time work experience in the US.

WORK EXPERIENCE

Product Developer - Famiglia del Favero, March 2025 - May 2026

- Built a wine brand from scratch: positioning, identity, website and digital catalog (JavaScript, HTML, CSS) and my own product photoshoot.
- Ran the brand's social media (Illustrator, Canva, video editing) and a small-budget Meta Ads campaign, adjusting targeting based on results.
- Managed costs, pricing, stock, margins and KPIs, and coordinated 3-4 white-label orders of up to 240 bottles with suppliers, following up through delivery.
- Identified the root cause of a quality failure (damaged labels in the first order) and created a physical MVP process before every large order.

Ski Instructor - Vail Resorts, December 2025 - March 2026

- Served 400+ customers in a demanding multinational environment, 100% in English (PSIA Alpine Level 1 professional certification).

FEATURED PROJECTS

Sueldate — Undergraduate thesis (Role: CPO/CTO) (B2B earned wage access SaaS, team of 3)

- Defined the product (employee app and payroll-system integration) and the roadmap with an MVP and first 15 clients; as a team, we sized the market and built the financial model. Presented and defended before a jury.

MeliPro (business evaluation case, Mercado Libre)

- Analyzed a portfolio of 500 suppliers (AR/BR/MX), solved 6 data quality problems and discarded 3 of 5 AI-generated findings that failed robustness checks.

Predictive Churn (telecommunications, team project)

- Compared Logistic Regression, Random Forest and XGBoost in Python, balancing classes with SMOTE (best model: XGBoost, 96% accuracy and 0.94 recall).

AI Content Automation (personal project)

- Built a Python workflow (yt-dlp, Whisper, Gemini API) that transcribes video and selects the best clips with summaries and timestamps.

Leader of the Easter Mission 2026 (leadership and volunteering, 2022 - present)

- Fully responsible for a 200-person event: coordinated teams and suppliers and managed a budget of ARS 15,000,000, with zero major incidents.

Community Manager (3 active accounts)

- Managed content for a wine brand, a parish community and an amateur football team, with graphic design and video editing.

EDUCATION

Universidad de San Andrés (UdeSA) - B.A. in Digital Business, March 2022 - September 2026

- Coursework in Data Science, Operations Research, Digital Marketing and Digital Product Management.

TECHNICAL CERTIFICATIONS

- SQL (Advanced) - HackerRank, September 2026 | Power BI - Santander Open Academy, August 2026 | Google Ads Search Certification - Google Skillshop, September 2026

SKILLS AND OTHER

Data: Advanced SQL, Python (pandas, NumPy, scikit-learn, XGBoost, Keras), Power BI, Power Query, Tableau, advanced Excel.

Product: Figma, agile methodologies (Scrum, Kanban), Notion, JavaScript / HTML / CSS.

Brand & social: Illustrator, Canva, video editing, Meta Ads, Google Ads.

Applied AI: AI APIs (Gemini), AI agents, AI-assisted coding tools, Git, cloud.

Languages: Spanish (native), English (advanced - validated by full-time work experience in the US).
